SUMMARY

React and Next.js developer with 7+ years of experience building scalable, high-performance user interfaces. Most recently led frontend development of an enterprise React SPA at Medserv — owning architecture decisions, translating Figma designs into production UI, and mentoring a junior developer. Experienced integrating REST APIs and leveraging AI-assisted development tools (Gemini API, Claude API) to accelerate delivery. Comfortable across the full stack including NestJS, Strapi CMS, PostgreSQL, and self-hosted deployments. Open to hybrid or remote roles.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Vue, Tailwind CSS, MUI, Zustand, React Query, React Hook Form, Zod, Vitest

Backend: Node.js, NestJS, Express.js, Strapi CMS, REST APIs, PHP (Laravel)

Databases: MySQL, PostgreSQL, MongoDB

DevOps & Tools: Hetzner VPS, Coolify, Netlify, Docker (basic), Git, GitHub

AI Integration: Google Gemini API, Anthropic Claude API

EXPERIENCE

Frontend Developer (Fullstack)

Medserv · Full-time · Remote · Dublin, Ireland · Mar 2023 – Present

- Led frontend development of a React SPA using React, MUI, React Query, React Hook Form, and Vitest — owning architecture decisions independently
- Designed per-insurer dynamic form validation using Zod schemas that switch per provider within a single reusable form component
- Built a CSRF-protected authentication layer with dual Axios instances and automatic session-timeout handling
- Mentored a junior developer — code review, pair programming, and guidance on React patterns and best practices
- Orchestrated a bulk price update feature end-to-end — built the Vue frontend interface and implemented the corresponding backend logic in Laravel to handle the new routes
- Transitioned into fullstack responsibilities, contributing across PHP/MySQL legacy backend including debugging complex business logic and delivering new features
- Delivered visual redesigns for company beta websites using Sass and Tailwind CSS
